CHALLENGE #01

WEB-DEVELOPMENT PROJECT DOCUMENTATION

PROJECT TITLE: **JAMCUTS INSPO**

PROJECT GOALS:

1. **Inform and Inspire**: Provide a comprehensive resource showcasing a variety of men's haircuts to inform and inspire visitors.

2. **User-Friendly Interface**: Create a simple and intuitive layout for easy navigation, ensuring a seamless user experience.

3. **Visual Appeal**: Use HTML, CSS, and JavaScript to design an aesthetically pleasing website that highlights the diversity of men's haircuts.

4. **Educational Content**: Integrate informative content about each hairstyle, including styling tips and maintenance suggestions.

5. **Responsive Design**: Ensure the website adapts well to different devices, making it accessible to users on desktops, tablets, and smartphones.

TECHNOLOGY STACK:

HTML: Structure the content of the website, organizing information in a logical and accessible manner.

CSS: Style the website to enhance visual appeal, making it attractive and user-friendly.

JavaScript: Add interactivity to the website, incorporating features like showing the sidebar or back to top button.

LAYOUT PLAN:

1.HOMEPAGE

- Welcome users with a visually appealing layout.
- Navigation menu for easy access to different part of the web.

2.HAIRCUTS PAGE/SECTION

- Thumbnail images with brief descriptions for each hairstyle.
- Sections dedicated to various haircut types.

3. RESPONSIVE DESIGN

- Ensure the website layout adjusts gracefully to different screen sizes.

In the development of JamCuts Inspo, I will apply my learnings from W3Schools, incorporating best practices in HTML, CSS, and JavaScript to create a user-friendly and visually appealing website showcasing diverse men's hairstyles.
